THE JOURNEY TO EXTREME PERFORMANCE

DESIGNED

ONLY POLARIS ENGINEERED ACCESSORIES™ are conceived, designed and fabricated in lockstep with the Polaris RZR® development process. As the vehicle progresses from concept to production, so do the accessories. This ensures a perfect fit and optimal performance.

TESTED

THE POLARIS® TESTING PROCESS is rigorous and unforgiving. We put every vehicle and accessory through extreme-use conditions both in the lab and in the field—in all environments, and in locations spanning the continent. If it doesn't pass our standards, it's not ready for your Polaris® vehicle. Only the best accessories make it to production.

TRUSTED

DEVELOPING THE BEST, MOST PREMIUM accessories in the industry is our passion. Only Polaris® can combine decades of industry-leading experience, innovation and off-road expertise. Have confidence in your Polaris Engineered Accessories™, because we know the lifestyle and live it every day.

POLARIS® PARTNERS WITH THE BEST

We choose our partners carefully, selecting only the best in off-road. Every accessory is rigorously tested and validated at Polaris® standards to ensure seamless integration and performance.

INTRODUCING

RIGID®

ADVANCED TECH

RIGID® lights are driven by Aluminum PCB Smart Boards™ with copper thermal conductive pads, gold-plated electrical contacts, 6063-T5 aircraft aluminum extruded housings treated with Alodine® corrosion preventive, and Tiger Drylac® UV protectant polyester powder coating.

EXCLUSIVE OPTICS

RIGID® hand-selects the brightest high-tech LEDs from the best manufacturers. The LEDs shine through patented optics that maximize total light output and efficiency. RIGID® lights feature impact-resistant polycarbonate lenses for a 100% waterproof /dustproof seal.

RIGID® LIMITED LIFETIME WARRANTY

If you own a RIGID® light and it breaks, we will replace or repair it for life.*

ADAPT® **NEW**

The most advanced lighting solution on the market. Adjust the lighting pattern for your needs via the in-dash controller. As you change speed and terrain, you can dial in the light from spot to flood.

D-SERIES PRO **NEW**

These lights produce extremely high output while consuming very little power. The compact size and shape allow the D-Series LED Light to fit almost anywhere and be used for virtually any lighting application.

SR-SERIES PRO **NEW**

These single-row LED Light Bars provide a sleek, powerful, low-profile lighting solution that measures less than 2" tall. The SR-Series is designed to project light at extreme distances while consuming very little power. Available in a wide range of lengths and configurations.

8 BEAM PATTERNS

Select from 15 to 90 degrees—the pattern changes when and how you want.

BEAM ADAPTS TO ANY SITUATION

MATCH YOUR STYLE

Choose from any color in the spectrum to reflect your style or current mood.

CHANGE FROM THE DASH

A backlit, molded dash controller allows you to control the beam pattern and color.

LIGHTING

PRO ARMOR®

RUGGED STYLING, DURABLE CONSTRUCTION

Pro Armor® lights are designed to be big and beefy with an aggressive style all their own. Housed in IP67 marine-grade rated UV Polyester powder-coated with precision-cast end panels and oversized, extruded aluminum heat sinks to keep the temperature down.

EXCLUSIVE OPTICS

Counting up to 66 3-5 watt CREE® LEDs, Pro Armor® builds bright lights designed for any riding experience. All that power is directed through heat-dissipating aluminum printed circuit boards for streamlined heat management.

DUAL-ROW LED LIGHT BARS

For the most spread and the farthest illumination downrange, Pro Armor® Dual-Row Light Bars are easy to mount and perform beyond expectations. Choose from several lengths and configurations.

CUBE LIGHTS

Small and powerful, these cube lights can be mounted in strategic locations for added lighting.

SINGLE-ROW LED LIGHT BARS

Powerful and compact, these low-profile light bars look sleek and let you light up the night. Choose from several lengths and configurations to extend your ride.

PRO ARMOR®

CONQUER ANY TERRAIN WITH PRO ARMOR® TIRES.

As an industry leader in premium off-road accessories for more than a decade, Pro Armor® delivers purpose-built tires with superior durability and ultimate performance for the environment you ride. Developed and tested with Polaris® engineers—ensuring the perfect fit and optimal performance mile after mile.

PRO ARMOR®

TIRES

WHEELS & TIRES

Polaris® and Pro Armor® developed a deep partnership thanks to having similar histories and a passion for producing products that enhance vehicle performance. Each wheel and tire Pro Armor® designs and engineers for Polaris® off-road vehicles performs perfectly in the intended environment for its intended use. Developed, tested, and produced in partnership so you can tackle the terrain ahead.

10-PLY

Pro Armor® builds the toughest tires to keep you running when the terrain turns tough. A higher ply rating means added protection. Choose your tire and ply rating based on use and overall performance needs.

DUAL COMPOUNDS

You don't ride or drive in just one type of terrain, so Pro Armor® builds certain tires with multiple wear zones. A dual-durometer design allows the tire to wear better with softer outer lugs and harder inner lugs.

TRIPLE-BELTED SIDEWALLS

Sidewalls can be a vulnerable area of any off-road tire. Rocks jump out at your machine and tear into sidewalls. Thanks to reinforced construction in this critical area, Pro Armor® resists when others fail.

TORTURE-TESTED TOUGH SIDEWALLS

Most tire makers only test puncture resistance in the tread and along the bead. In the toughest terrains you're more likely to puncture the sidewall. Pro Armor® builds its tires with triple-belted sidewalls, minimizing the chance of a puncture in that area. We also tested against the competition at Smithers Rapra, an independent facility with experience in the tire industry (Smithers.com). The results are clear.

DUAL-COMPOUND = MORE GRIP

Dual-compound tires feature both a softer durometer rubber on the outer edge of the tire, and a harder durometer rubber in the middle. This gives the tire the perfect balance between high-speed performance with durability and excellent flex in order to grip slick rock or hard pack.

PRO ARMOR® DUAL-THREAT **NEW**

SHORT LUG, SINGLE DUROMETER

Smaller lug height and single durometer gives this high-speed tire added rigidity and lateral stability when cornering. Its unique lug design excels in hard-packed, fast terrain.

TALL LUG, DUAL-DUROMETER

With its taller lug height and dual-durometer construction, this tire has the perfect balance between high-speed performance, durability and flex in order to grip slick rock.

WHEEL & TIRE SETS

These wheel and tire sets by Pro Armor® are paired to deliver maximum performance for your RZR®. The chart lists all possible combinations that work together and each of the vehicles on which they fit. Choose your preferred tire along the top, and pair it with your preferred wheel on the side. The corresponding square lists the part number for a complete four wheel & tire set.

WRAPS

A CUSTOM WRAP IS THE PERFECT WAY TO EXPRESS YOUR PERSONALITY. From a mild finish that compliments the lines of your machine to a wild graphic scheme that allows you to stand out, Polaris® gives you the ability to make your RZR® completely your own, through UTVFX Graphics and its WrapR Online graphics app.

- Use the WrapR App to design your custom wrap for your RZR® on your handheld device or computer by visiting utvfxgraphics.com
- You are able to visualize the final product on your specific machine by picking from multiple RZR® models inside the app
- More than 3 million unique combinations of colors and graphics are possible
- Turnaround time is fast, with order through production and shipping within 24 hours
- Easy to install with air-release channels built into the adhesive, this helps eliminate bubbles when applying the wrap
- Built to survive the off-road world, with a 16-mm thick vinyl/laminate combination—3x as thick as the closest competitor
- Return or exchange product, no questions asked, within the first 10 days. Also provide replacements at material cost within the first year of purchase

QUICK GLANCE, WIDE-ANGLE VIEWING FOR MAXIMUM VISIBILITY

WINDSHIELDS

POLY VS **GLASS**

Lightweight and flexible material is **IMPACT-RESISTANT**, providing long-term value and protection. Guarantees a **TIGHT SEAL** to keep out rain and dust. **HARD COAT** provides **30x** more scratch resistance than regular poly.

Superior **OPTICAL CLARITY** for a clear view. Laminated safety glass **PROTECTS FROM SCRATCHES** and provides automotive-level visibility.

HARD COAT POLY

FLIP-DOWN WINDSHIELD - HARD COAT POLY

- Versatile, adjustable windshield lets you choose full protection or open-air running
- Easy to install and made of tough polycarbonate with scratch-resistant hard coat
- Two-position design can be adjusted quickly without the use of tools

SPECIFIC NEEDS, SPECIFIC OILS

Polaris® invests millions in engine development, and part of that investment is making sure its lubricants—critical to engine performance—are the right formula for your specific engine. The amount of testing data and engineering resources used in developing Polaris® lubricants would overwhelm an aftermarket company. Therefore, the aftermarket must spec an oil to an industry-wide standard that must account for a variety of operating parameters.

PS-4 is designed specifically for Polaris® 4-cycle engines and has high film strength and wear protection under extreme loads and temperatures. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.

POLARIS® PS-4 VS THE COMPETITION

Polaris® PS-4 oils exceed the latest industry protection standard as set by the API, while the competition uses standards from years ago. Our proprietary additives clean and protect critical engine parts under high operating temperatures.

When tested against competitive oils, camshaft bearing races and lobes exhibit less wear when protected by Polaris® PS-4 oil.

PS-4 delivers 25% stronger viscosity protection for gears, pistons, cams and bearings vs. 40wt. oils

WHY VISCOSITY MATTERS: Polaris® engines are designed to operate using oils rated at a specific viscosity. Viscosity is the measure of an oil's resistance to flow and shear and a way to gauge an oil's "film strength", which is a critical component in preserving engine life when an oil is subject to high heat or heavy loads.

ENGINEERED TO MAXIMIZE THE LIFE OF YOUR RIDE

All Polaris® fluids—from anti-freeze to brake fluid—are developed for your vehicle. Trust the only fluids perfectly engineered for your needs.

AGL

A proprietary blend of additives designed to optimize Polaris® ORV transmission life. Extreme pressure additives protect gears, drive chain, and bearings from scoring and wear. Unlike typical gear case oils, AGL's unique viscosity range allows instant flow and film protection in extreme cold or high heat environments

FOR THE LIFE OF YOUR RIDE

THE KEY TO KEEPING YOUR POLARIS® OFF-ROAD VEHICLE PERFORMING

as well as the day you brought it home is proper maintenance. Items like belts, filters and batteries represent only a few of these critical items engineered specifically by Polaris®.

CHECK OUT OUR [PARTS FINDER ON POLARIS.COM](https://www.polaris.com) FOR EASY PARTS LOOK-UP, PARTS IDENTIFICATION, VIEWS OF ASSEMBLIES AND MORE!

POLARIS ENGINEERED™ DRIVE BELTS

Polaris Engineered™ belts deliver unmatched performance for your off-road vehicle. Our belts are developed and tested on all our engines for all environments and conditions. This ensures it doesn't merely fit your vehicle—it outperforms your expectations.

TESTED, PERFECTED

We test each belt on the intended vehicle – we don't try to make an existing belt "just work." The tolerances are tighter than aftermarket alternatives, meaning less heat for your engine, and you won't have to recalibrate your clutch in order to run at the engine's optimal RPM. Aftermarket belts fluctuate in and out of the optimal power band, which means more wear on your clutch and more maintenance needed to maintain power.

OUR INVESTMENT

We average **20,000** miles of field testing and **thousands of dyno hours** on each engine to ensure the Polaris® drive belt on your machine gives you peak performance with each and every ride.

POLARIS POWER®

POWERFUL, PORTABLE, DURABLE. These digital inverter generators are built to match your outdoor lifestyle, and are tested to the same rigorous standards as every Polaris® product. The 1000-watt generator is best for running a single device with low wattage requirements. The 2000-watt generator runs multiple devices with added surge protection and start-up wattage. The 3000-watt generator handles high-output needs and runs multiple devices. It also includes electric start for ease of use when needed.

WHICH GENERATOR FITS YOUR NEEDS?

- 1 START** by adding up the running watts of everything you might power at the same time. (use the chart on below)
- 2 NEXT**, pick the device with the highest running watts, and add its starting watts to the previous total.
- 3 NOW** you have the total amount of watts you need from your generator. Select a generator with a slightly higher wattage.

Never let a dead vehicle battery slow you down again. The Polaris® Flex Jumpstarter is a compact solution that provides the power to get your ride started. Flex is small enough to be stored in your glovebox, and holds its charge so you can count on it when it's needed. In addition to being able to jumpstart ATVs, ORVs, snowmobiles, motorcycles, cars, & trucks, Flex can also charge any USB capable device through its dual USB outlets. Flex has the ability to jumpstart up to a 6.4L engine.

BatteryMINDER®

Make sure your vehicle's battery is properly maintained and ready for when you need it the most with a BatteryMINDER®. A tired battery is waiting for the perfect time to ruin your day, so make sure it gets charged and cycled properly. Easily one of the most essential pieces of equipment every garage needs.

BATTERYMINDER® 1510 1.5-AMP

- Recovers weak batteries
- Ambient temperature sensor with wide operating range ensures the battery will never be overcharged or undercharged regardless of temperature extremes
- Extends battery life up to four times when compared to new batteries not being properly charged or maintained over their lifetime

HOW IT WORKS

Tire sealant remains liquified inside your tire until a leak develops in the tire or wheel.

Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug.

The sealant plug maintains the pressure of the tire so you can continue your ride.
