# DESIGNED FOR YOU ENGINEERED TOUGH

**POLARIS**<sup>®</sup>  
ENGINEERED PARTS  
ACCESSORIES & APPAREL

Ensuring Polaris Engineered Accessories™ fit and work in sync with your machine is the most critical phase of testing and validation. With seamless integration, you can trust that any Polaris® accessory you install will enhance your interaction beyond your expectations.

## DESIGNED

Only Polaris Engineered Accessories™ are conceived, designed and fabricated in lockstep with the Polaris SPORTSMAN® development process. As the vehicle progresses from concept to production, so do the accessories. This ensures perfect fit and optimal performance.

## TESTED

The Polaris® testing process is rigorous and unforgiving. We put both vehicle and accessory through extreme use conditions both in the lab and in the field - in all environments, and in locations spanning the continent. If it doesn't pass our standards, it's not ready for your Polaris® vehicle. This means only the best make it to production.

## TRUSTED

Developing the best, most premium accessories in the industry is our passion. Only Polaris® can combine decades of industry-leading experience, innovation, and off-road expertise. You can have confidence in your Polaris Engineered Accessories™, because we know the lifestyle and live it everyday.

## POLARIS® PARTNERS WITH THE BEST

We choose our partners carefully, selecting only the best in off-road. Every accessory is rigorously tested and validated at Polaris® standards, to ensure seamless integration and performance.

## PLOW SYSTEM

When you have the power of a Glacier® Pro Plow System on your machine, you can truly take command of clearing snow and moving whatever you need to. Find the blade that fits your needs and you'll make quick work of even the heaviest jobs.

### THE POLARIS ENGINEERED™ ADVANTAGE

#### INSTALLATION

30 seconds: Drive up, clip in, lock down, and go – the integrated Polaris Engineered™ Glacier® Plow System simplifies plowing.

#### CONVENIENCE

Lift and angle adjustments can be made from the driver's seat.

ANGLE YOUR BLADE RIGHT FROM YOUR SEAT WITH THE GLACIER® PRO PLOW HYDRAULIC ANGLE SYSTEM

#### ROBUST FRAME

A plow system is only as strong as its frame, and Polaris Engineered™ plow frames have a wide frame to withstand the rigors of heavy plowing.

#### DURABILITY

Available in strong stamped steel or corrosion-resistant poly materials, Polaris Engineered™ plow blades cover a large surface area for quick snow removal.

# PRO ARMOR®

# TIRES

Polaris® and Pro Armor® developed a deep partnership thanks to having similar histories and passion for producing products that enhance vehicle performance. Each wheel and tire Pro Armor® designs and engineers for Polaris® off-road vehicles perform perfectly in the intended environment for its intended use. Developed, tested, and produced in partnership so you can tackle the terrain ahead.

## 10-PLY

Pro Armor® builds the toughest tires to keep you running when the terrain turns tough. A higher ply rating means added protection. Choose your tire and ply rating based on use and overall performance needs.

## DUAL COMPOUNDS

You don't ride or drive in just one type of terrain, so Pro Armor® builds certain tires with multiple wear zones. A dual-durometer design allows the tire to wear better with softer outer lugs and harder inner lugs.

## TRIPLE-BELTED SIDEWALLS

Sidewalls can be a vulnerable area of any off-road tire. Rocks jump out at your machine and tear into sidewalls. Thanks to reinforced construction in this critical area, Pro Armor® resists when others fail.

## TORTURE-TESTED TOUGH

Pro Armor® pushes beyond normal-use testing, and blows by extreme-use testing. The duty cycle developed by Pro Armor® engineers puts other tires to shame. When you mount a set of Pro Armor® tires, be assured they're ready for rugged terrain.

## 3,000 MILE RATED

Pile on the miles with Pro Armor® tires. Every tire is designed and constructed with longevity in mind. With ratings of 3,000 miles and beyond, you are assured long life and performance.

**DIMENSIONS**  
**28" x 9" R14**  
TIRE HEIGHT | TIRE WIDTH | WHEEL DIAMETER

**TREAD DEPTH**  
A deeper tread means more grip and better performance

**WEIGHT**  
A lighter tire makes for improved vehicle performance

**PLY RATING**

## PRO ARMOR® DUAL-THREAT **NEW**

Engineered with dual-compound technology and radial construction to offer revolutionary off-road performance in all terrains. The lateral-grip compound on the outer edges of the tire has a softer durometer rubber for cornering performance and superior grip. The long-wearing compound in the middle of the tire has harder durometer rubber for increased traction during acceleration, straight line stability, and overall longer tread life.

# ALL-TERRAIN TRACTION

It's tough to make Sportsman® and Polaris ACE® even more versatile than they already are. But with a set of Prospector Pro® Tracks, you'll do just that. Tread through deep snow without concern.

Polaris®-specific gearing provides 1:1 ratio to:

- Minimize track slip, providing better climbing ability and improved traction in deep snow
- Improve top speed over prior models by approximately 5%
- Reduce operating RPM for a quieter ride
- Improve driveline durability, which allows vehicle to run at a lower RPM, decreasing engine wear

Polaris® Exclusive optimized hub geometry that minimizes feedback and eases steering effort

Flexible lug design provides the highest level of deep snow performance by lifting up in deep snow as opposed to digging down

New front dual stabilizer for improved stability

Lightweight design provides for better flotation, eases steering effort, and provides better vehicle control

INTRODUCING

# RIGID®

## ADVANCED TECH

Rigid® lights are driven by Aluminum PCB Smart Boards™ with copper thermal conductive pads, gold-plated electrical contacts, 6063-T5 aircraft aluminum extruded housings treated with Alodine® corrosion preventive, and Tiger Drylac® UV protection polyester powder coating.

## EXCLUSIVE OPTICS

RIGID® hand-selects the brightest high-tech LEDs from the best manufacturers. The LEDs shine through patented optics that maximize total light output and efficiency. RIGID® lights feature impact-resistant polycarbonate lenses for a 100% water/dustproof seal.

# PRO ARMOR®

## RUGGED STYLING DURABLE CONSTRUCTION

Pro Armor® lights are designed to be big and beefy with an aggressive style all their own. Housed in IP67 marine-grade rated UV Polyester powder-coated with precision-cast end panels and oversized, extruded aluminum heat sinks to keep the temperature down.

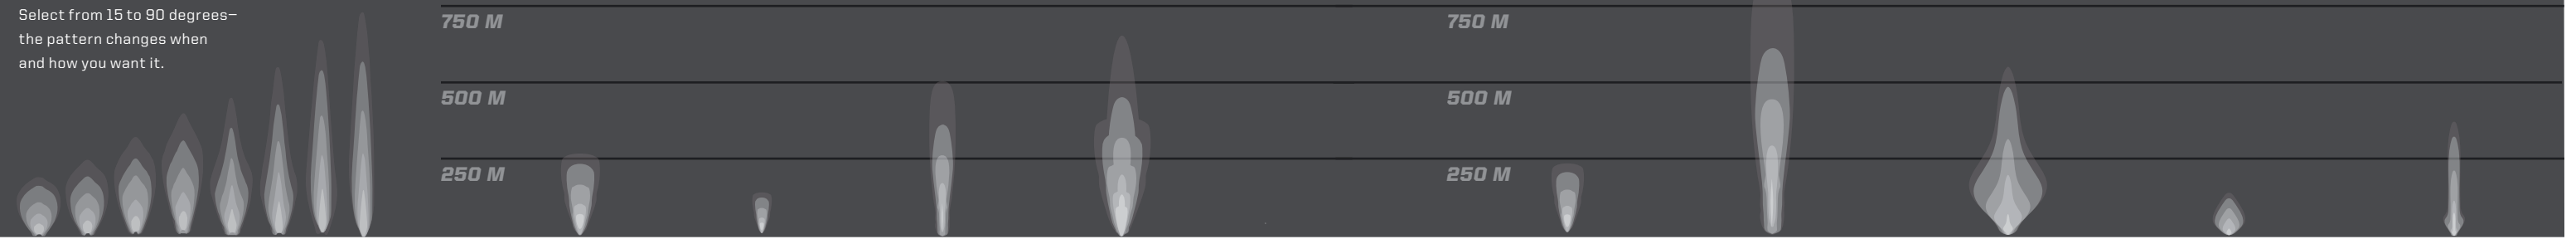

## MASSIVELY BRIGHT

Counting up to 66 3-5 watt CREE® LEDs pushing over 11,000 lumens, Pro Armor® lights are some of the brightest in the industry. All that power is directed through heat-dissipating aluminum printed circuit boards for streamlined heat management.

# SPECIFIC NEEDS, SPECIFIC OILS

Polaris invests millions in engine development, and part of that investment is making sure its lubricants—critical to engine performance—are the right formula for your specific engine. The amount of testing data and engineering resources used in developing Polaris lubricants would overwhelm an aftermarket company. Therefore, the aftermarket must spec an oil to an industry-wide standard that must account for a variety of operating parameters.

PS-4 is designed specifically for Polaris 4-cycle engines and has high film strength and wear protection under extreme loads and temperatures. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.

## POLARIS® PS-4 VS THE COMPETITION

Polaris® PS-4 oils exceed the latest industry protection standard as set by the API, while the competition uses standards from years ago. Our proprietary additives clean and protect critical engine parts under high operating temperatures.

When tested against competitive oils, camshaft bearing races and lobes exhibit less wear when protected by Polaris® PS-4 oil.

PS-4 delivers 25% stronger viscosity protection for gears, pistons, cams and bearings vs. 40wt. oils

**WHY VISCOSITY MATTERS:** Polaris® engines are designed to operate using oils rated at a specific viscosity. Viscosity is the measure of an oil's resistance to flow and shear and a way to gauge an oil's "film strength", which is a critical component in preserving engine life when an oil is subject to high heat or heavy loads.

## ENGINEERED TO MAXIMIZE THE LIFE OF YOUR RIDE

All Polaris® fluids—from anti-freeze to brake fluid—are developed for your vehicle. Trust the only fluids perfectly engineered for your needs.

### AGL

A proprietary blend of additives designed to optimize Polaris® ORV transmission life. Extreme pressure additives protect gears, drive chain, and bearings from scoring and wear. Unlike typical gear case oils, AGL's unique viscosity range allows instant flow and film protection in extreme cold or high heat environments

- » 1 QT. • 2878068
- » 1 GAL. • 2878069
- » 2.5 GAL. • 2878070
- » 55 GAL. • 2879594

Proper lubricant application and timing will ensure optimal vehicle performance. Please refer to your owner's manual for lubricant change interval schedules.

### ANGLE DRIVE FLUID

ATV Angle Drive Fluid offers extreme pressure, anti-wear, and high viscosity film lubrication for maximum protection of Polaris® ATV angle gear drive systems conditions

- Excellent corrosion protection for long component life under severe operating conditions
- » 1 QT. • 2876160
- » 2.5 GALLON • 2872276

### DOT 4 BRAKE FLUID

Polaris® DOT 4 Brake Fluid is a high quality brake fluid designed for use in Polaris® hydraulic brakes. Superior high-temp characteristics plus anti-corrosive additives extend the life of brake system components and provide consistent, positive braking

- » 12 OZ. • 2872189

### ANTI-FREEZE

Polaris® Extended Life Coolant contains organic acid technologies to prevent corrosion on metal components, eliminate scaling, and maximize cooling system performance

# FOR THE LIFE OF YOUR RIDE

## THE KEY TO KEEPING YOUR POLARIS® OFF-ROAD VEHICLE PERFORMING

as well as the day you brought it home is proper maintenance. Items like belts, filters and batteries represent only a few of these critical items engineered specifically by Polaris®.

CHECK OUT OUR [PARTS FINDER ON POLARIS.COM](https://www.polaris.com) FOR EASY PARTS LOOK-UP, PARTS IDENTIFICATION, VIEWS OF ASSEMBLIES AND MORE!

## POLARIS ENGINEERED™ DRIVE BELTS

Polaris Engineered™ belts deliver unmatched performance for your off-road vehicle. Our belts are developed and tested on all our engines for all environments and conditions. This ensures it doesn't merely fit your vehicle—it outperforms your expectations.

### TESTED, PERFECTED

We test each belt on the intended vehicle – we don't try to make an existing belt "just work." The tolerances are tighter than aftermarket alternatives, meaning less heat for your engine, and you won't have to recalibrate your clutch in order to run at the engine's optimal RPM. Aftermarket belts fluctuate in and out of the optimal power band, which means more wear on your clutch and more maintenance needed to maintain power.

### OUR INVESTMENT

We average **20,000** miles of field testing and **thousands of dyno hours** on each engine to ensure the Polaris® drive belt on your machine gives you peak performance with each and every ride.

# POLARIS POWER®

**POWERFUL, PORTABLE, DURABLE.** These digital inverter generators are built to match your outdoor lifestyle, and are tested to the same rigorous standards as every Polaris® product. The 1000-watt generator is best for running a single device with low wattage requirements. The 2000-watt generator runs multiple devices with added surge protection and start-up wattage. The 3000-watt generator handles high-output needs and runs multiple devices. It also includes electric start for ease of use when needed.

## WHICH GENERATOR FITS YOUR NEEDS?

- 1 START** by adding up the running watts of everything you might power at the same time. (use the chart on the left)
- 2 NEXT**, pick the device with the highest running watts, and add its starting watts to the previous total.
- 3 NOW** you have the total amount of watts you need from your generator. Select a generator with a slightly higher wattage.

	Startup Wattage	Running Wattage

### POLARIS® FLEX JUMPSTARTER

12,000 mAh capacity. Two 5V/2.1A USB outputs, 200-lumen flashlight and a digital battery-life monitor. Includes storage case, smart jumper cables, car charger, wall charger, and user guide. 1-year limited warranty.

» 2830495 • \$119<sup>99</sup>

Never let a dead vehicle battery slow you down again. The Polaris® Flex Jump-starter is a compact solution that provides the power to get your ride started. Flex is small enough to be stored in your glovebox, and holds its charge so you can count on it when it's needed. In addition to being able to jumpstart ATVs, ORVs, snowmobiles, motorcycles, cars, & trucks, Flex can also charge any USB capable device through its dual USB outlets. Flex has the ability to jumpstart up to a 6.4L engine.

## BatteryMINDER®

Make sure your vehicle's battery is properly maintained and ready for when you need it the most with a BatteryMINDER®. A tired battery is waiting for the perfect time to ruin your day, so make sure it gets charged and cycled properly. Easily one of the most essential pieces of equipment every garage needs.

#### BATTERYMINDER® 1510 1.5-AMP

- Recovers weak batteries
- Ambient temperature sensor with wide operating range ensures the battery will never be overcharged or undercharged regardless of temperature extremes
- Extends battery life up to four times when compared to new batteries not being properly charged or maintained over their lifetime
- Automatic full-time high frequency (not high voltage) pulse type desulfation
- Reverse polarity, short circuit, and over temperature protection

## HOW IT WORKS

Tire sealant remains liquefied inside your tire until some sort of leak develops in the tire or wheel.

Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug.

The sealant creates a permanent solid plug and maintains the pressure of the tire so you can continue your ride.
